At VT Batteries, we are proud to have established a leading position in the global market, offering high-performance energy solutions tailored to the specific needs of our customers. Our mission is based on fundamental pillars that define who we are: quality, loyalty, reliability and non-conformity. These values drive every decision and action, allowing us to maintain an unwavering commitment to innovation and excellence.

Our catalogue consists of a careful selection of automotive, stationary, industrial, leisure and solar batteries, developed under rigorous technical standards. Each product line reflects the experience and backing of the international brands we represent, ensuring that our solutions integrate optimally into the local environment and meet market demands.

We are committed to the development of the worldwide industrial fabric, working closely with our customers and strategic partners to promote cutting-edge energy projects. At VT Batteries, our commitment to quality, loyalty, reliability and non-conformity allows us to challenge the status quo and continue to offer products and services that make a difference in the energy sector.

Quality: At VT Batteries, we select and distribute batteries of the highest quality, ensuring that each product meets the most demanding standards of performance and durability.

Reliability: Our commitment is to offer energy solutions you can rely on. We distribute batteries from recognised brands, guaranteeing a safe and constant supply for any application.

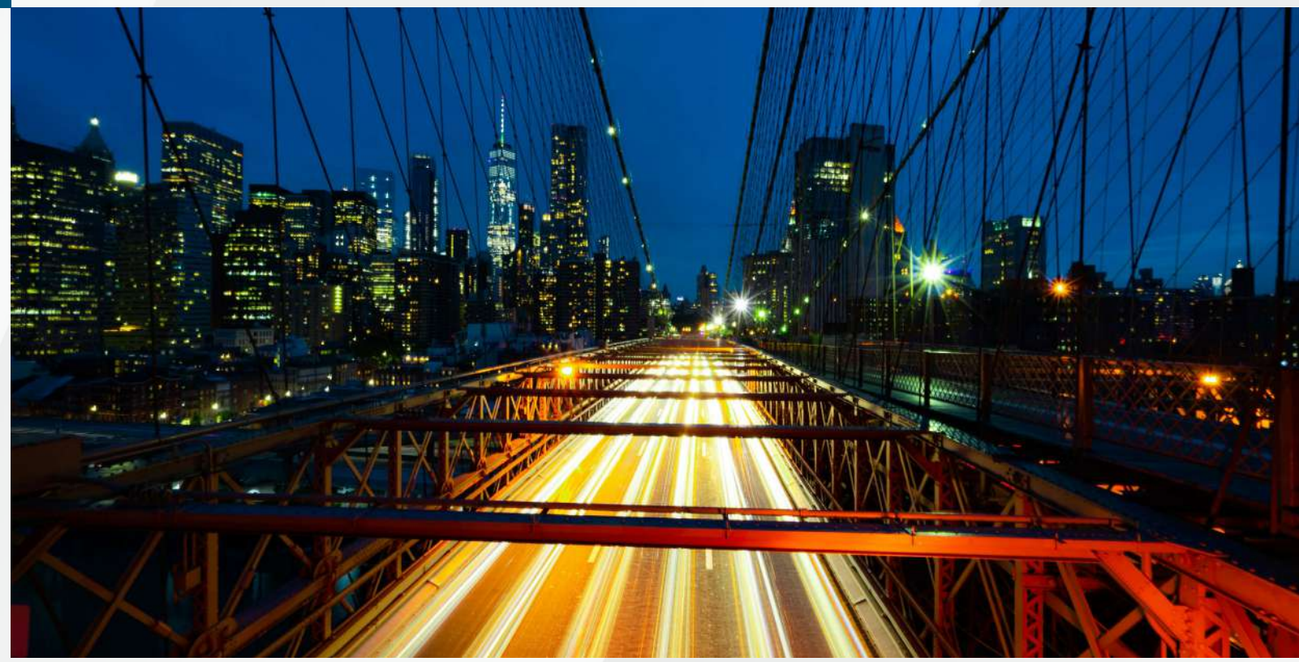
Nonconformity: We are not satisfied with the status quo. At VT Batteries, we are constantly seeking new and better solutions in battery distribution, ensuring that our customers always have access to the most advanced technology.

Loyalty: We build long-term relationships with our customers and suppliers based on trust and commitment. At VT Batteries, our priority is to offer a friendly, honest and efficient service.

AREAS OF ACTIVITY

At VT Batteries, we are dedicated to the marketing and distribution of high-quality energy solutions for the international market, covering various areas of activity including automotive, stationary, industrial, leisure and solar batteries. Each of these lines has been designed to meet the specific demands of each sector, from ensuring optimal starts and performance in vehicles to offering secure backup systems in fixed applications, as well as robust solutions for industry, versatile proposals for leisure activities and efficient alternatives for harnessing renewable energy.

Our entire catalogue is based on our pillars of quality, loyalty, reliability and non-conformity, values that drive us to innovate and maintain an unwavering commitment to excellence, positioning us as an essential benchmark in the international energy sector.



Unlimited energy.
Power to Keep You Going.

Lucas

Founded in 1875 in Birmingham, England, Lucas began by producing lamps before becoming a **pioneering force in automotive electrical systems.** Over the years, the brand expanded into magnetos, dynamos, starters, lighting, and later into braking systems through its acquisition of Girling. With a history spanning nearly 150 years, Lucas has grown into one of the **most recognized and trusted names in the automotive world,** celebrated for its innovation, reliability, and commitment to quality.

At VT Batteries, we are proud to be the exclusive licensee of Lucas batteries in more than 70 markets across Africa and the Americas. Our range includes **advanced battery technologies designed to meet the needs of modern vehicles, from passenger cars to commercial fleets.** By distributing Lucas, we deliver a brand with heritage and proven performance, ensuring our customers benefit from both trusted tradition and cutting-edge power solutions.

#PowerToKeepYouGoing

VT Power distributes only original equipment in the global battery market. These are batteries of the highest quality, performance and durability. Vtpower products are manufactured by leading companies in the global battery market. These are batteries of the **highest quality, performance and durability.**

All ranges are equipped with a status indicator, which identifies the actual charge status of the battery. The range covers all European and Asian vehicles currently in circulation.

VT Batteries has developed a wide range of competitively priced batteries using different technologies: **Conventional, Start&Stop, etc.** This range comes with the same guarantees as a leading brand thanks to various agreements with our suppliers, ensuring **maximum quality and service life.** The guarantees offered to our customers are 2 years up to 100Ah, and 1 year above 100Ah.

The multinational company EXIDE manufactures **starter** and industrial batteries for almost all major manufacturers on the continent at its various production centres in Europe.

As a long-standing player in the battery industry, EXIDE brings **quality, technology and expertise** to all its products, which are positioned at the top end of the market in competition with leading brands.

At VT BATTERIES, we have an extensive catalogue of EXIDE brand products so you can find the battery that best suits your needs. The Exide battery range is synonymous with reliability and quality. With extensive experience and as the main supplier to many vehicle brands, Exide batteries offer **great performance and durability.** Our portfolio includes trusted brands such as **TUDOR, DETA, AND FULMEN,** each with a long history of quality and innovation. We have a large stock available, so please consult our team of professionals if you have any questions. Inside

VULCAN offers a wide range of products for the **leading vehicles** on the market. The brand's most important value lies in its unbeatable value for money.

Accredited original equipment manufacturers guarantee the optimal **performance** of the entire range, which has been on the market for several years now with performance comparable to that of leading brands.

Present in various markets, VULCAN has positioned itself as a competitive option in **Europe and Latin America**, providing high-performance, durable batteries. Its products feature advanced technology, ensuring excellent starting capacity, resistance to charge and discharge cycles, and a long service life.

WILLARD BATTERIES, founded in 1927 by the Peláez brothers, has been dedicated to the **import and distribution of batteries** since its inception. In 1959, the first production line in Colombia was launched with EXIDE, becoming the property of the PELAEZ HERMANOS company in 1987.

The factory located in Barranquilla produces more than two million batteries annually, mainly in the BCI, DIN and Heavy Duty ranges.

Exporting batteries since 2000, BATERÍAS WILLARD is currently one of the leading manufacturers in Latin America, present in more than 18 countries, with one of the widest and highest quality ranges, under the EXTREMA brand. All its products come with an 18-month warranty, and it is considered one of the **leading brands** in the energy storage sector in South America, with constant growth and future expansion of its facilities.

Esan Battery was founded in 1978 in Istanbul and began producing batteries under the name Esan Battery and Materials Industry & Trade Inc. The Mursa factory produces more than three million batteries annually for **cars and light and heavy commercial vehicles.**

In 2016, ESAN began production at the Gebze factory and also developed the production of battery cases and the recovery of lead and metals.

To meet the equipment and displacement requirements of different vehicle makes and models, they are manufactured with the Esan guarantee. High-performance MF and SMF batteries have a long service life thanks to high-tech production **technology** and special chemical receptions. ESAN serves its customers through distributors nationwide, regional distributors, sub-distributors, and after-sales service points. 60% of ESAN's production is exported to three continents. With 40 years of experience, expertise and the motto 'Positive Energy', ESAN embraces the principle of **environmental awareness and customer satisfaction.**

#PowerToKeepYouGoing

Founded in 1963, ALMABAT specialises in the **production and marketing of automotive and industrial batteries.** The quality of its products and its years of experience make it the leader in the Moroccan market, with significant international market share.

The company essentially develops four production segments in which its results in terms of quality, durability and innovation are indisputable.

The ALMA brand from ALMABAT offers a range of products that meet the most demanding standards of the **European and Asian markets.** Its international experience guarantees its results, both in batteries for passenger cars and in the heavy vehicle segment. The main production of the Casablanca factory focuses on starter batteries for light and heavy vehicles and other applications (passenger cars, trucks, taxis and agricultural applications, among others).

DURACELL

Duracell Inc. is an American manufacturer of **alkaline batteries**, speciality batteries, and rechargeable batteries; it is a wholly owned subsidiary of Berkshire Hathaway.

Duracell has its origins in the **partnership** between scientist Samuel Ruben and businessman Philip Rogers Mallory, who met in the 1920s. The P. R. Mallory Company of Burlington, Massachusetts, moved its headquarters to Indianapolis, Indiana, in 1924.

Duracell has been responsible for many industry firsts, such as the first **AA** and **AAA** alkaline batteries and the first button for hearing aids. Duracell batteries were even the first to land on the moon and powered the first Logitech wireless mouse, making working with computers much more comfortable.

BOSCH

Bosch is one of the world's leading brands in technology and innovation, with over a century of experience in manufacturing advanced solutions for the automotive and industrial sectors. Its commitment to quality and sustainable development has positioned Bosch as a benchmark in the industry, offering high-performance, reliable and safe products.

In the field of batteries, Bosch offers a wide range designed for motorcycles, leisure vehicles and auxiliary systems. Its motorcycle batteries guarantee **powerful starts and maximum resistance to vibrations, ideal for any type of riding. Leisure batteries** are designed for caravans and boats, providing a stable and long-lasting power source for long journeys. On the other hand, its auxiliary batteries stand out for their **high storage capacity and deep cycles,** ensuring an efficient energy supply in vehicles with higher electrical demands.

Founded in 1925 by Captain Albert Girling, the brand quickly made its mark with the invention of an advanced braking system that transformed automotive safety. Over the decades, Girling became synonymous with **innovation**, from pioneering disc brakes in partnership with Formula 1 legends to becoming part of Lucas Industries, where it expanded into brakes, clutches, dampers, and other components.

At VT Batteries, we are proud to include Girling among the respected brands we distribute. Their products embody the quality, reliability, and long-lasting performance that our customers expect, making them a perfect fit for our portfolio. By offering Girling, we ensure that our clients have access to a trusted name with nearly a century of history behind it—**reinforcing our mission to deliver only the best in battery and automotive solutions.**

INDUSTRIAL BATTERIES

VTBatteries offers high-quality energy solutions designed to meet the demands of demanding applications. Our catalogue includes products ideal for trucks, industrial vehicles, caravans, golf carts, etc., ensuring optimal and reliable performance in every environment.

Each battery is manufactured to strict quality standards and equipped with state-of-the-art technology, enabling optimised efficiency, durability and resistance even in extreme conditions. This versatility translates into products that are suitable for both intensive starting applications and continuous use systems, always ensuring maximum operational reliability.

The strength of our portfolio lies in our strategic alliances with internationally renowned brands such as VT Industrial, Aokly, Trojan, Sonnenschein, Qbatteries, Enersys, and SPE. These collaborations allow us to integrate the most advanced innovations and ensure that each battery complies with international safety and environmental regulations.

www.vtpower.es

BATTERIES AND CHARGERS

We have an extensive catalogue of batteries and chargers to meet different needs, both domestic and professional. We offer versatile and reliable options, ideal for everyday devices, specialised equipment and specific applications. Our range includes:

Batteries:

- AA
- AAA
- CR2032
- V23GA
- 9V

Chargers:

- Lithium charger (BL 12-10)
· CBHF2 Charger
