Start&Stop batteries are designed for vehicles equipped with systems that automatically shut off and restart the engine during stops. They offer a higher charge and discharge cycle capacity and are designed to withstand the frequent energy demands of these vehicles. Depending on the system, they may use EFB or AGM technology.

3x

More start cycles than an equivalent flooded battery.

0

Maintenance and no spills: electrolyte absorbed, sealed vessel with valve.

60-105

Ah, in five sizes, from 680 to 950 A cold start.

HOW TO CHOOSE

SERIE BS · STANDARD

- Vehicles without a Start-Stop system
- Conventional electricity consumption
- 15 sizes, from 40 to 225 Ah
- Tourism, light commercial and industrial

BK SERIES AGM

- Start-Stop and energy recovery
- High demand: air conditioning, audio, telematics
- Greater resistance to cycling and vibration
- Maintenance-free, spill-free
